Created in house Complex Payment Solution for NAS administration services that can handle claims, authorizations, eligibility checks, accounts with the ability to cope up with several coding standards. This application is more than a complex banking application.

Integrate powerful messaging system into different in house & client application to send SMS Messages & email

WORK EXPERIENCE

Senior Software Engineer   April 2008 - Present

NAS & Neuron TPA, Dubai, Silicon Oasis, United Arab Emirates

Brief Description : NAS (http://www.nas.ae) is a leading TPA (Third Party Administrator) of Health Insurance Companies for managing the Medical Insurance business. Currently NAS is responsible for handling the claims of approximately 1 million beneficiaries. The Company works under the guidance of different health authorities of GCC countries. The Company also provides the IT consultancy for Health Insurance companies and other TPA.

- Part of the development team working independently on system modules. Majorly participated in development of **PBM**, **JeT**, **Travel Insurance** and **Production** module.
- Maintaining, upgrading and servicing all the modules with special emphasis in rectifying bugs and upgrading the software for all technical queries.
- Prototyping, design, coding, testing and deployment. Participate with the internal and external teams to define plans for standardizing, scaling and enhancing our products and the services utilized to deploy/install/release those products.
- Automated around 40-50 business processes which led to the high business efficiency and also remove long running process from the application and executed them as a separate job.
- Participate in interactions with customers as a technical expert for product subsystems. Investigate, analyze and make recommendations to management regarding technology improvements, upgrades and modifications.

Software Engineer   Oct 2006 - Mar 2008

Medsons Private Limited, Karachi, Pakistan

Brief Description : MEDSONS (http://www.thevitesse.com) is one of the largest garment buying houses of Pakistan that belongs to the Dadabhoy group (a prominent industrial group of Pakistan).The Company has its offices in Pakistan, Dubai and USA.

- Adding the new module in the existing Order Management System (VOMS – Vitess Order Management System). Update the existing module as per the requirements of Merchandiser.
- Maintaining,& upgrading the company's official website.
- MIS Report generation. Providing support to other sister concerned companies.

MAJOR PROJECTS

Pharmacy Benefit Management System (PBM) : The application works as business rule engine at the back end and has multiple checks that have been integrated at different operational levels with the experience of the medical team and the claims management experience of the industry. Also integrate FDB (First Data Bank) API to perform pure medical adjudication.

JeT : This is an online Web based Health Insurance portal used by millions of Health Service Provider (Pharmacy / Polyclinics & Diagnostics Center / Hospital) all over the Gulf. Provider can submit approval request, their medical claims, check their account status Client can also generate E-Claim.

Data Exchange : We developed this application for exchanging the Insurance data b/w two complete different systems by using EDI Certificate (Electronic Data Exchange). This system download the xml file from client ftp, decrypt the contents and import in our system by passing multilevel of data transformation and finally generated encrypted reply as xml package and sent back to client as notification
